PROFESSIONAL SUMMARY

Data and analytics professional with 3+ years in healthcare data analytics, Snowflake data warehousing, and full-stack web development. Cut executive healthcare reporting turnaround by ~38% at Zelis Healthcare; built production web tools for Australian and NZ energy retailers at EnergyTech Global; completing a Master of Data Science at RMIT University, Melbourne.

TECHNICAL SKILLS

Data Warehousing & Engineering: Snowflake SQL (CTEs, window functions, stored procedures, RBAC) · data migration · data modelling & slowly-changing dimensions · reporting data marts · PostgreSQL · ETL
Healthcare & Domain Analytics: US healthcare claims & payer analytics · provider-directory data · financial reconciliation · network analytics
Programming & Web Development: Python (pandas, Flask, Plotly/Dash) · full-stack web & application development · REST APIs · R
BI, Visualisation & ML: Power BI (Desktop, Service, DAX, Power Query, RLS) · Tableau · ML classification · time series analysis · Git/GitHub

PROFESSIONAL EXPERIENCE

Zelis Healthcare India — Jan 2024 – Mar 2025
Data Analyst — Hyderabad, India (Hybrid)
US-headquartered healthcare payments and analytics company (Boston, MA) · ~4,000 employees · 700+ payers · 1.5M+ providers

- Reworked Snowflake stored procedures and multi-table joins, cutting weekly executive reporting from ~4 hours to under 2.5 hours across 14 reports for 700+ US healthcare payers (~38% faster).
- Migrated reporting tables and rebuilt data models in the Snowflake warehouse, speeding up Power BI refreshes and giving US product leadership near-real-time payer visibility.
- Built the Weekly Payer Performance Report in Power BI, pulling financial reconciliation, network analytics, and provider-directory data into one self-service dashboard for US executive leadership.
- Set up Snowflake RBAC across product, analyst, and executive groups, keeping data governance and audit trails intact.

EnergyTech Global — Feb 2023 – Dec 2023
Software Analyst, Data & Web Development — Hyderabad, India (Onsite)
AI engineering company; technology backbone for Australian retailer ReAmped Energy and NZ retailer Electric Kiwi

- Built energy-consumption analytics web tools in Python, PostgreSQL, and Plotly/Dash for ReAmped Energy's operations team, used for usage tracking, anomaly detection, and billing checks.
- Developed a contract-tracking web app for ReAmped Energy (AU) and Electric Kiwi (NZ), handling lifecycle data across multiple retail-energy tariff structures.
- Wrote and tuned PostgreSQL queries for contract tracking, usage reporting, and customer segmentation across ANZ retail-energy clients.

PROJECTS

DENTOR: Dental Booking & Teleconsultation App — *Android · Firebase · Video API*
Full-stack Android app for dental appointment booking and video teleconsultation, with real-time video calls, user authentication, and automated email confirmations.

Energy Analytics Web App (ReAmped Energy / Electric Kiwi) — *Python · PostgreSQL · Flask · Plotly/Dash*
Real-time energy-consumption monitoring web tools for Australian and NZ retail-energy operations teams.

PIRvision: Machine Learning Classification — *Python · scikit-learn · pandas*
Binary classification pipeline on 7,651 sensor readings, comparing Decision Tree and KNN across accuracy, precision, recall, and F1, with feature engineering and cross-validation.

EDUCATION

Master of Data Science, RMIT University, Melbourne VIC — Feb 2025 – Nov 2026
Machine Learning · Time Series Analysis · Data Wrangling · Data Visualisation · Database Concepts · Advanced Python · CRICOS 093313B

Bachelor of Engineering (IT), Vasavi College of Engineering (Osmania University) — 2019 – 2023
CGPA 8.50/10, First Class with Distinction (~80.75%) · NAAC A++ accredited · Hyderabad, India

CERTIFICATIONS

Executive Data Science Specialisation (5 courses), Johns Hopkins University / Coursera, Dec 2023 · Google Cloud: Digital Transformation; Security & Operations · CCNAv7: Introduction to Networks, Cisco / Coursera
